

01

SLIDE THE HEADBAND THROUGH THE HEADPADDING

Slide the metal headband through the headpadding, until the headpadding is positioned in the middle of the headband.

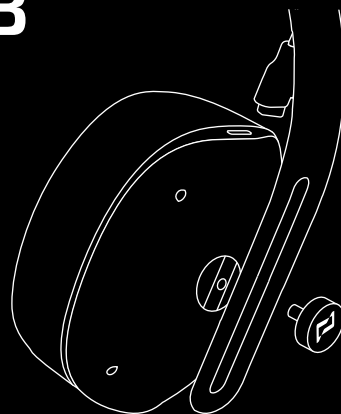

02

ATTACH THE EARPADDINGS TO THE SOUND BOXES

This might need some force, but afterwards both modules align perfectly. The arrows on the soundbox provide guidance in which direction to rotate.

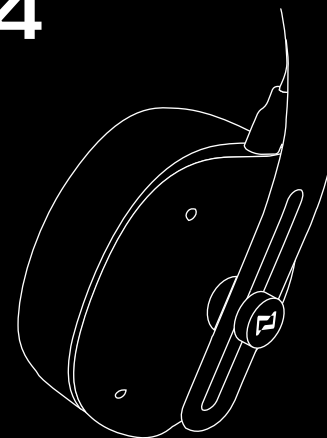

03

MOUNT THE SOUND BOXES ON THE HEADBAND USING THE SCREW KNOBS

Make sure the sound box is in the upright position, with the **jack input facing down**.

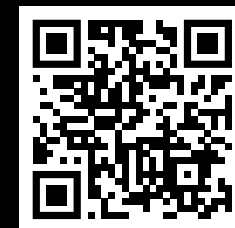

04

CONNECT THE CABLES FROM THE HEADBAND TO THE SOUND BOXES

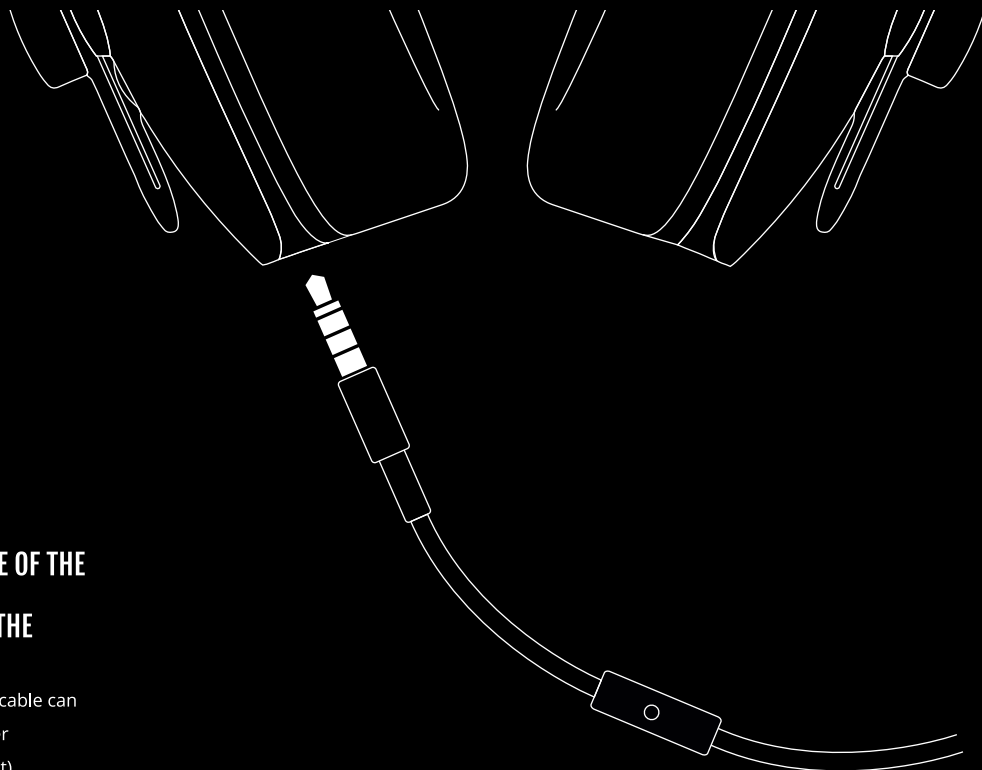

They are connected properly when you hear them click. (Don't be too careful, it might take a bit of force to connect them well).

Designed in the Netherlands
Made in China for Repeat®
Assembled by you

Need help assembling or how to use the headphones? Scan the QR-code or go to repeat.audio/day-how-to

05

CONNECT THE SIDE OF THE CABLE WITH THE MICROPHONE TO THE HEADPHONES

The 3.5mm mini-jack cable can be connected to either soundbox (left or right).

You know what sucks? Having to buy new headphones (again) because one small part can't be repaired. And your old ones? Either incinerated or dumped in a landfill...

We're here to help you break this cycle. Repeat headphones deliver unparalleled sound quality in a revolutionary modular design, which lasts forever. Because music lovers deserve better.
