

01

SLIDE THE HEADBAND THROUGH THE HEADPADDING

Slide the metal headband through the headpadding, until the headpadding is positioned in the middle of the headband.

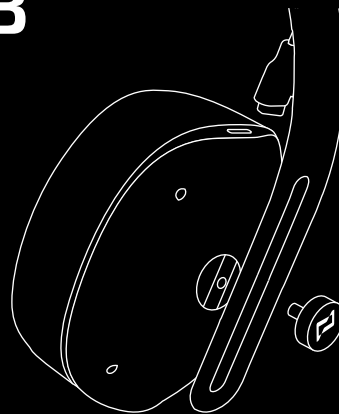

02

ATTACH THE EARPADDINGS TO THE SOUND BOXES

This might need some force, but afterwards both modules align perfectly. The arrows on the soundbox provide guidance in which direction to rotate.

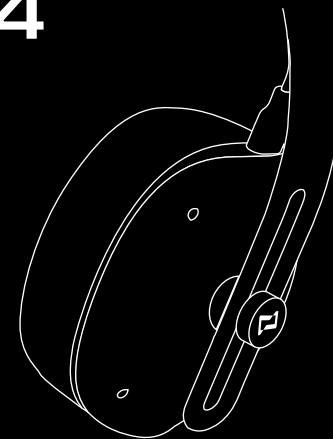

03

MOUNT THE SOUND BOXES ON THE HEADBAND USING THE SCREW KNOBS

Make sure the sound box is in the upright position, with the **remote control buttons facing down**.

04

CONNECT THE CABLES FROM THE HEADBAND TO THE SOUND BOXES

They are connected properly when you hear them click. (Don't be too careful, it might take a bit of force to connect them well).

BLUETOOTH BUTTON

Press 2 sec : Turn on PRINCE
Press 5 sec : Turn on + Pairing mode
Press 3 sec : Turn off
Single touch : Play/Pause song & Answer call/End call

GETTING STARTED

TURNING THE PRINCE ON/OFF

Turn the headphones on by pressing the **Bluetooth button** for 3 seconds. Your headphones will automatically connect to the device it was paired to previously. Turn the PRINCE off by pressing the Bluetooth button for 3 seconds again.

HOW TO PAIR YOUR PRINCE

Press and hold the **Bluetooth button** for 5 seconds. The headphones will tell you it's pairing. The headphones will be named 'RP Prince'. Once successful, you'll hear a 'dong', confirming the connection.

PHONE CALLS

ANSWER AN INCOMING CALL

Answer an incoming call simply by pressing the **Bluetooth button** once. Press again to end the call. Use Ambient mode when in a call for a transparent sound.

USING MULTIPPOINT

HOW TO PAIR YOUR PRINCE

The PRINCE can be paired with two devices simultaneously.

- 1 Connect your PRINCE to your first device.
- 2 After connecting, deactivate Bluetooth on your first device, PRINCE will move to pairing mode.
- 3 Now connect your PRINCE to your second device.
- 4 Turn on the Bluetooth on your first device again and your PRINCE will automatically reconnect.

USING ACTIVE NOISE CANCELLING

ENABLE ACTIVE NOISE CANCELLING

By pressing the **ANC button** once, Active Noise Cancelling is activated. You'll hear "noise cancelling" and the LED right beside the button will now glow green.

ACTIVATE AMBIENT MODE

Ambient Mode lets your surroundings in, as if you're not wearing headphones at all. Convenient when in traffic, or while making a phonecall. Enable ambient by pressing the ANC button again, after activating the ANC. You'll now hear "ambient" and the LED will glow white.

TURN OFF ANC/AMBIENT

To turn off the ANC and Ambient, keep pressing the ANC button for 2 seconds. The LED will turn off as well. This is recommended to preserve battery life.
